

SVPAL Mission Statement

SVPAL provides online services for access to Internet and local community information, and provides education in the use of those services. It directs its efforts towards users with limitations in finances, technical abilities, or physical capabilities. SVPAL operates as a responsible, non-profit organization, ensuring stable and long-term operation and is run primarily by volunteers.

Welcome to SVPAL

We are glad that you have joined our family of SVPAL members. SVPAL is dedicated to making the Internet accessible to our Silicon Valley community. Our goals are to provide the following:

- Affordable communications for the people of our community
- Outreach and training -- particularly to those who are not being served today
- Local on-line content provided by local organizations
- Access to outside information providers

Would you like to volunteer to work with us at SVPAL? Your voluntary support is important for the success of SVPAL. A detailed explanation of the volunteer opportunities appears in the About SVPAL menu, once you are on-line. You can also see volunteer opportunities on our web site: WWW.SVPAL.ORG. To become involved, send Email to volunteer@svpal.org, or call our office (phone number listed on front cover).

Continuing Development of SVPAL

Over the next year, we hope to greatly improve our system. We intend to make SVPAL easier to use and to identify any problems or bugs. To do this, we will need the help of our members. Please tell us about any difficulties and provide suggestions so we can improve the system. If certain parts of the SVPAL system are confusing, or need simplification and clarification, please send us an Email to support@svpal.org.

The system may experience some failures and downtime as we continue to expand and grow in both equipment and operations. Although SVPAL will strive to minimize such disruptions, we cannot guarantee that the system will always be available.

Your contributions of volunteer time and tax-deductible donations will help strengthen our organization as we reach towards our goals.

Getting Started

SVPAL now offers two types of Internet access: Text-based and PPP. Text-based access is SVPAL's traditional access providing an easy-to-use text menu interface requiring only terminal emulation software. PPP (Point-to-Point Protocol) access provides a graphic interface and is used with modern Internet browser, Email, Telnet, and other software. If you have signed up for the PPP service, you also have access to the Text-based interface. Information on how to use both access types is described below.

PPP Setup Summary

This page provides the basic information needed to configure PPP for any computer. More detailed step-by-step instructions for Windows XP and Window 2000 can be found later in this document. Go to the next page to begin the setup procedure.

Human Requirements

You need basics computer skills to set up your SVPAL connection. You may need to download and install additional software. If you cannot do that, you want to ask someone to help you. The step-by-step instructions may look complicated, but that is only because they need to be comprehensive. Do not let this intimidate you.

Hardware Requirements

To connect with SVPAL, you need a computer, a modem, and a phone line. If your computer and modem can communicate with each other, you have everything you need.

Quick Start

This is all the information you need:

login:	user-name (for PPP login use user-name@svpal.org)
password:	your-password
Email Address:	user-name@svpal.org
SVPAL POP server:	pop.svpal.org
SVPAL SMTP server:	smtp.svpal.org
SVPAL DNS servers:	209.68.147.66, 209.68.147.69
SVPAL news (NNTP) server:	news.svpal.org
Phone Numbers:	408-453-9950, 650-961-3569

Use your own user name for **user-name** and password for **your-password**, not "**user-name**" or "**your-password**". Your user name and password are printed in your new user letter. CASE MATTERS. **janedoe** and **JaneDoe** are not the same, as far as the system is concerned. The same applies to your password. Be sure to enter them exactly as they appear on your new user letter. SVPAL user names are always lower case, but passwords may contain upper and lower case letters.

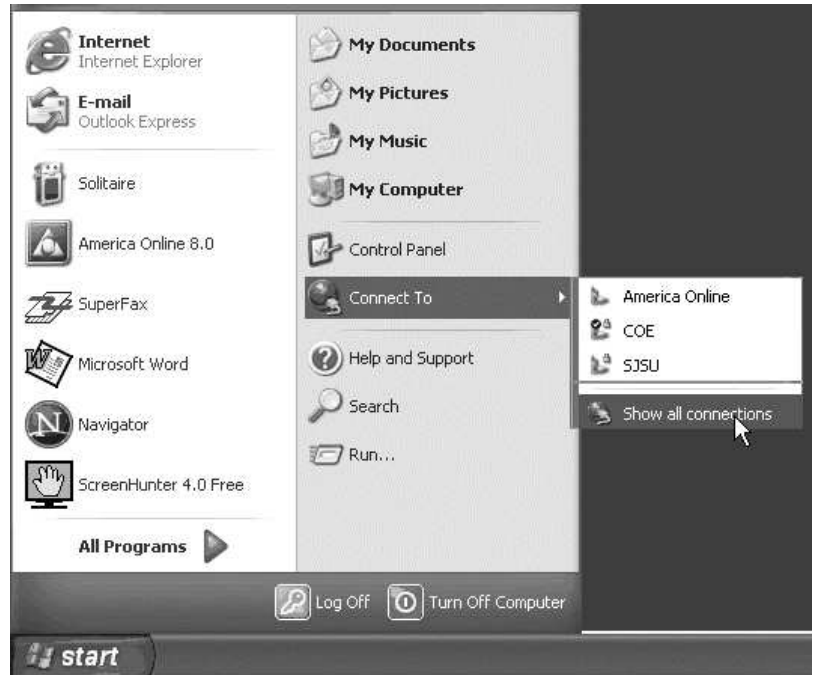

You are required to provide your user name and password to use services at SVPAL. You use them to establish a dialup connection to SVPAL, to access your email, and sometimes for other services. For example, if your user name were **janedoe**, your PPP user name would be **janedoe@svpal.org**, and your e-mail user name would be **janedoe**. Your email address would be **janedoe@svpal.org**.

If your computer was pre-installed with Windows XP you should not need to install additional software. If you installed or updated the system yourself, you may need to install additional Windows components to support networking.

PPP Setup for Windows XP

Configuring your SVPAL PPP dialup connection

Click the **Start** button at the bottom left of your screen to show the Start menu. Click on the **Connect To** button and then the **Show all connections** button on the popup menu.

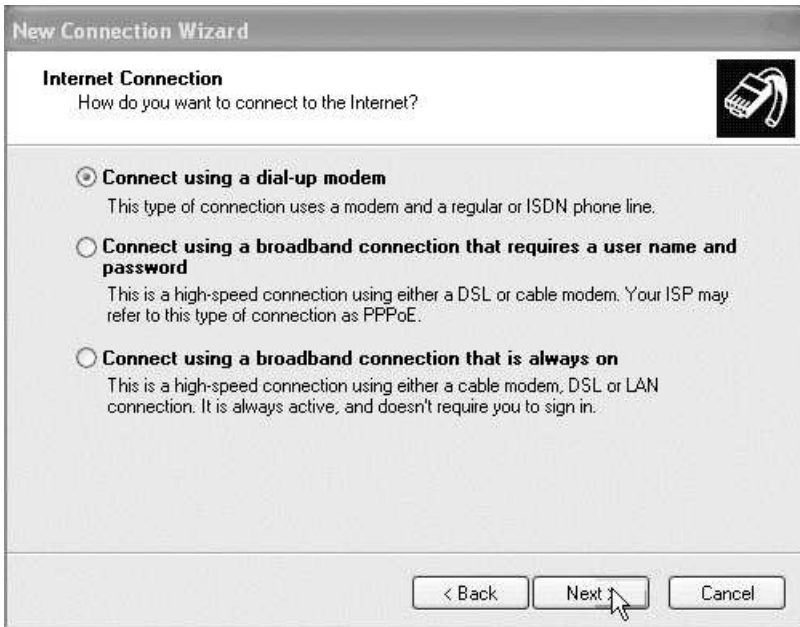

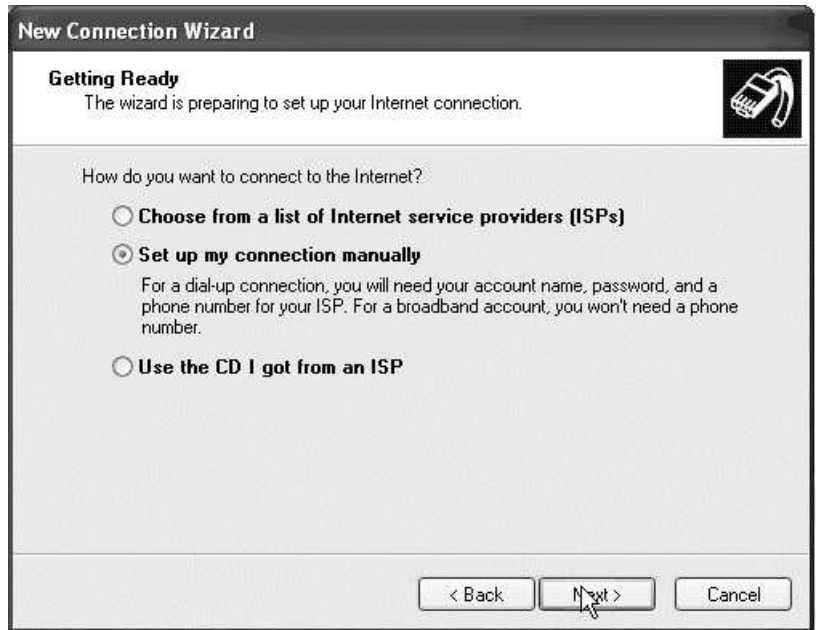

In the *Network Tasks* section of the menu, select **Create a new connection**. This starts the *New Connection Wizard*.

On the *New Connection Wizard* click the Next button.

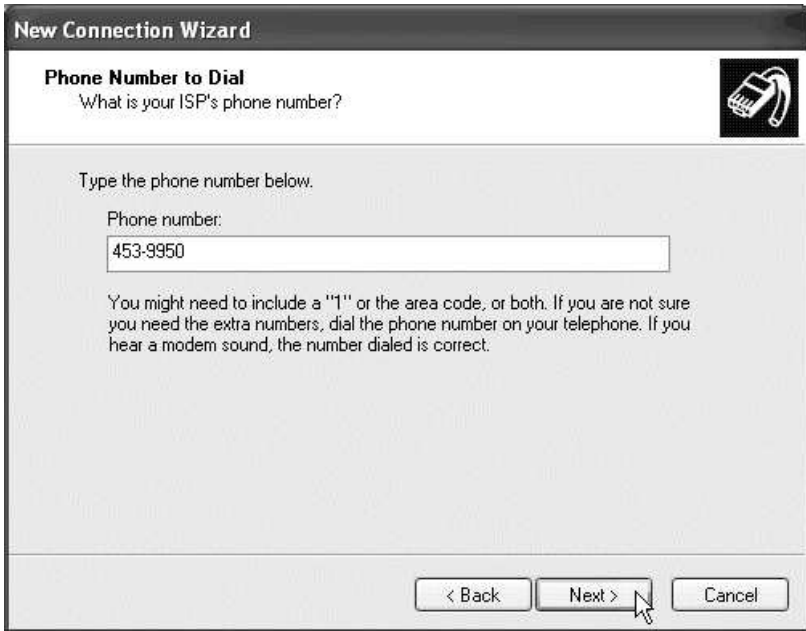

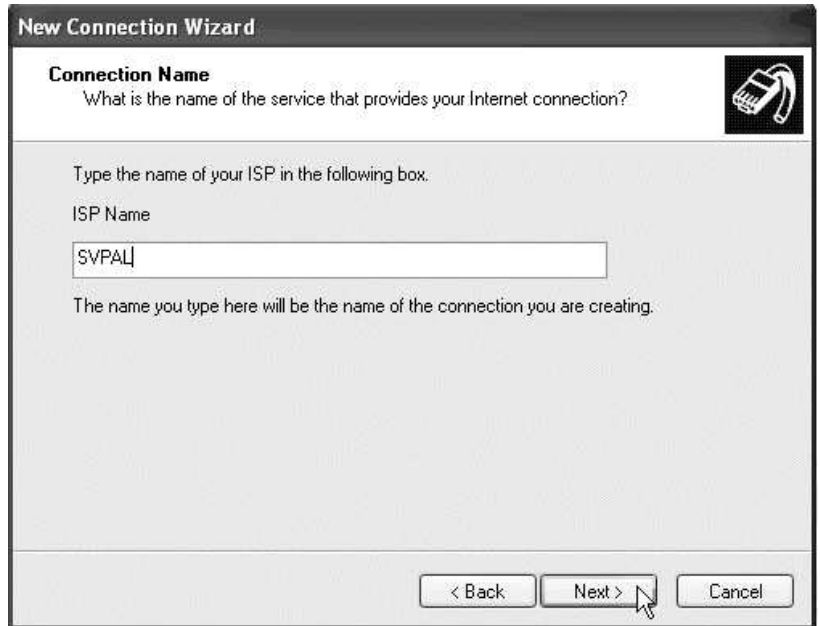

Here you need to choose Connect to the Internet as your connection type. Then click the Next button.

Since we don't have an automatic setup procedure you must choose to **Set up my connection manually**. Then click the **Next** button.

You are connecting via a modem, so select **Connect using a dialup modem**. Then click the **Next** button.

Now name your connection something meaningful. This becomes important if you have more than one Internet Service provider. In this example we used **SVPAL**. Then click the **Next** button.

Enter the phone number you are dialing to connect with SVPAL. This example shows **453-9950**. Include the area code if it is different from your area code. You may want to confirm that dialing SVPAL is a local call by your telephone company to avoid toll charges.

Enter your SVPAL email address in the **User name** field. You may also enter **your-password** here. Enter the same password into both the **Password field** and the **Confirm password** field. If you are sharing this computer with others in your family, you may want to check **Use this account name and password when anyone connects...** Check **Make this the default...** if you want to connect automatically to SVPAL whenever you start your web browser. Check the **Turn on Internet Connection Firewall...** to protect your computer from being hacked or compromised by certain viruses and worms. This is highly recommended.

IMPORTANT NOTE: *the example shows janedoe as the user name. You should enter your SVPAL email address (e.g. janedoe@svpal.org).*

New Connection Wizard

Internet Account Information
You will need an account name and password to sign in to your Internet account.

Type an ISP account name and password, then write down this information and store it in a safe place. (If you have forgotten an existing account name or password, contact your ISP.)

User name:

Password:

Confirm password:

Use this account name and password when anyone connects to the Internet from this computer

Make this the default Internet connection

Turn on Internet Connection Firewall for this connection

< Back Next > Cancel

New Connection Wizard

Completing the New Connection Wizard

You have successfully completed the steps needed to create the following connection:

SVPAL

- Make this the default connection
- This connection is firewalled
- Share with all users of this computer
- Use the same user name & password for everyone

The connection will be saved in the Network Connections folder.

Add a shortcut to this connection to my desktop

To create the connection and close this wizard, click Finish.

< Back Finish Cancel

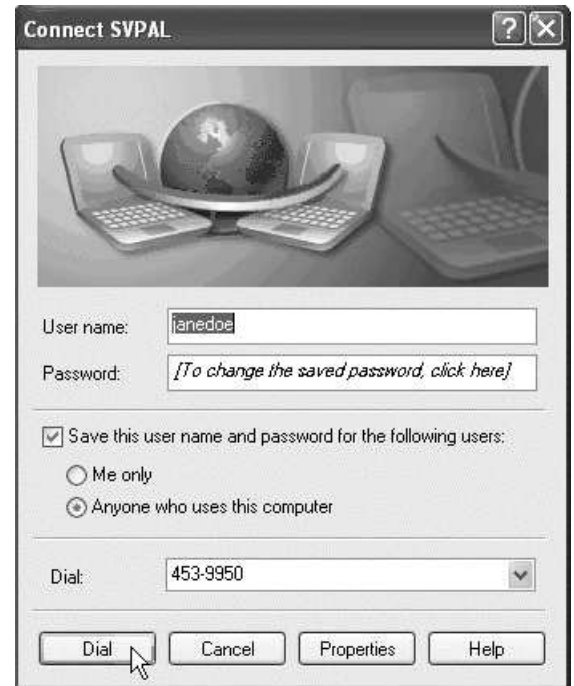

Now click the **Finish** button to finish with the *New Connection Wizard*.

Now you are ready to connect. Verify that you have entered your user name correctly. Also verify that you have the correct SVPAL phone number, including area code if needed. Click the **Dial** button to connect.

IMPORTANT NOTE: the example shows ***janedoe*** as the user name. You should enter your SVPAL email address (e.g. ***janedoe@svpal.org***).

If you have problems connecting, check your settings. The most likely problem is that you made a typing error somewhere. Check the phone number, your user name and password. Remember that your user name and password are case sensitive. SVPAL user names are always entered in lower case. Passwords can contain upper case letters and your initial password will contain upper and lower case letters. An example password might be **LowFatCar**.

After checking your settings, then you might try modifying your modem settings. These sometimes cause trouble.

Learning the System and Getting Support

SVPAL Customer Support helps ensure that your on-line experience is both fun and useful. We strive to answer questions about how to use SVPAL to the best of our abilities. Like the rest of our organization, we rely on dedicated volunteers to accomplish these tasks. If you have any questions, please look first in our on-line Frequently Asked Questions (FAQ's) in "About SVPAL". If your question isn't easily found, send an Email to support@svpal.org. Our volunteers will try to answer your issue as soon as possible.

In circumstances for which Email is impractical, i.e. for new users who may not yet know how to send Email or when the user can't logon, please call Customer Support's *voice mail help line* at 408-448-3072. We will do our best to return your call within 24 hours. Please leave a detailed message including your name, Email address (user name) and your phone number(s).

Terms of Use

Receipt of this package assumes you have read the terms of usage and will comply with them. Silicon Valley Public Access Link is committed to a policy of free expression and also of responsible use that does not restrict others from using and enjoying the system. A user of SVPAL agrees to the following terms as a condition of use of the system and agrees that the Board of Directors of SVPAL may revoke the privilege of use, at its sole discretion, if it determines the user's action was in deliberate violation of these terms:

1. I will use SVPAL in a manner that is consistent with all applicable laws and regulations.
2. I will obey copyright and license agreements will put copyrighted material on SVPAL only with written permission to do so from the copyright holder.
3. I will not disseminate on SVPAL information that is personal to others, such as credit card or social security numbers, nor will I disseminate communications that are clearly personal and private to others.
4. I will not share passwords. All accounts are individual accounts. An individual may allow immediate family or family-unit members LIVING IN THE SAME HOUSEHOLD to use the account. For class accounts or similar multi-user accounts, explicit arrangements must be made - contact SVPAL.
5. I will not attempt to gain unauthorized access to SVPAL, or use SVPAL to gain unauthorized access to other systems.
6. I will not flood the system or individual users with unsolicited e-mail.
7. I will not use SVPAL to publish libelous or slanderous material, or engage in any action that restricts or inhibits others from enjoying the system.
8. Agreeing to these terms, and with others that SVPAL may publish in the future; I will use SVPAL so as to respect the privacy and personal rights of others.

Password and Network Security

The security and privacy of your account depends on good password practices. **NOTE:** After you first login, you should change your temporary password. Passwords should be at least 8 characters in length. Common dictionary words are not advised. Similarly, any password, which is derived from your name, address, occupation or other personal information, is unsuitable because it can be easily guessed. Punctuation marks, numbers, and upper and lower case letters in the middle of the password helps to further secure your password.

Do not divulge your password to any other person outside your household. Never include your password in a mail message. If you forget your password, call Customer Support voice mail at 408-448-3072. A new temporary password will be issued to you.
